

DIGITAL SIGNATURE

The definitive electronic signature solution for swift, secure, and efficient contracting

Automates the digital signature process in compliance with current legal standards and regulations, such as the eIDAS Regulation in the European Union. Additionally, it ensures the legal validity of documents signed with the advanced electronic signature.

Enables the digital **signing of all documents generated** through Openfinance solutions, including suitability tests, convenience checks, KYC, investment proposals, and generated orders.

The platform **verifies and validates electronic signatures** in real-time, providing a report certifying the authenticity of the signer and the document's integrity.

Provides a **control panel** from which to manage documents for electronic signature, receive notifications, and track their status.

Functions of the solution

BIOMETRIC SIGNATURE

Adds an additional level of authenticity and security to electronic signatures performed on the platform by allowing the option to use biometric signatures—capturing and recording handwritten signatures in digital form.

BULK SIGNING

Enables the simultaneous sending of multiple documents to a large number of signatories in a single process.

CUSTOMIZED WORKFLOWS

Allows the customization of the signing process through templates, offering the possibility to place the signature wherever desired within each document.

ADVANCED CONFIGURATION

Enables the management of various settings, including the entity's look and feel, language, the number of signatories, the type of signature to be used (simple, typed, handwritten, biometric, OTP, PKI), expiration time, and reminders, among others.

DOCUMENT CUSTODY

Lleida.net cloud-based custody service preserves all electronically signed documents and digital evidence detailing all actions taken in the signing process for a period of 5 years.

MULTI-PLATFORM

Enables the management of electronic signatures from anywhere and any device without the need to install any software.

Advantages for business

- 1 Optimizes contracting and document management processes** swiftly and securely, improving response times and operational efficiency.
- 2 Provides greater security and confidence** in the signing process by securely backing up documents in the cloud. Electronically signed documents are legally binding, meeting international standards and regulations.
- 3 Saves significant costs** on printing, signing, sending, and storing documents, optimizing the use of internal resources.
- 4 Enhances the customer experience** and elevates the perceived service quality, promoting customer acquisition and retention.
- 5 Offers high flexibility** by allowing customized signature workflows, adapting to the needs of each entity.
- 6 Facilitates instant and seamless adoption**, as it doesn't require drastic changes to workflows or the entity's technological infrastructure.
